SUMMARY

Computer Science and Engineering graduate with hands-on experience building web applications and working with modern development and AI tools. Skilled in HTML, CSS, JavaScript, React, Python, Django, and SQL, with experience developing projects, debugging applications, and exploring AI-assisted workflows. Strong problem-solving mindset, quick learner, and passionate about building practical technology solutions. Seeking an entry-level opportunity to apply my technical skills, learn new technologies, and contribute to a growth-oriented team.

CORE

- Manual Testing: functional, regression, UI/UX, exploratory, and smoke testing
- prompt engineer, animation, video editing
- Test Documentation: test case design, test plans, requirement traceability, bug/defect reporting
- Software Testing Life Cycle (STLC) & Software Development Life Cycle (SDLC), Agile/Scrum basics
- Automation Testing (basic): Selenium WebDriver for browser/UI automation
API Testing (learning): Postman, REST API request/response validation
- Bug Tracking & Collaboration Tools: Git, GitHub, JIRA (learning), Trello
- Cross-browser & responsive UI testing, form validation, basic SQL for data verification Developer-side
- QA grounding: HTML5, CSS3, JavaScript (ES6), React, Django (Python), Computer Networks

PROJECTS

ShopNest Store — E-Commerce Website (React, Vite)

github.com/Hemamaalani/shopnest-store

Built a component-based React storefront and independently tested product listing, layout, and interactive UI flows for functional correctness and responsiveness

Performed manual cross-device/browser checks and fixed UI bugs found through self-driven exploratory testing

JobTrack — Job Application Tracker (HTML, CSS, JavaScript)

hemamaalani.github.io/job-application-tracker

Deployed a live web app (GitHub Pages) and validated add/filter/status-tracking flows against expected behavior across test scenarios (Applied, Interview, Selected, Rejected)

Wrote and executed test cases for dashboard calculations, catching and fixing data-sync and UI-state bugs before deployment

CardioSense — Deep Learning-Enhanced Early Heart Disease Detection *IEEE Conference Paper*

Co-authored a published IEEE paper on Vision Transformer / Deformable Attention Transformer models for medical image diagnosis; validated outputs against test datasets and documented edge-case findings

INTERNSHIPS

AI Animation Specialist Intern — Dinamalar 1 month

Created AI-generated videos using tools such as Google AI Studio, NotebookLM, Grok, LTX Studio, and Krea AI. Generated AI voiceovers and assisted in developing short-form video content. Experimented with AI workflows for video generation, animation, and content production.

Logritha Technologies — Student Mark Prediction System

Built and manually tested a Django web app connecting a regression ML model to a usable interface, verifying forms, inputs, and server-side rendering against expected results. Identified and reported functional issues during integration between the ML model and the web interface, then verified fixes.

Prodigy InfoTech Pvt. Ltd. — Machine Learning Basics

Completed applied tasks (house price prediction, customer clustering), validating model outputs against expected results

EDUCATION

- **B.E., Computer Science & Engineering — Sri Sai Ram Institute of Technology** ▪ 2022 – 2026
 - CGPA: 7.8
 - **HSC — St. Mary's Matriculation Higher Secondary School** ▪ 2021 – 2022
 - 82.8%
 - **SSLC — St. Mary's Matriculation Higher Secondary School** ▪ 2019 – 2020
 - 73.8%
-

COURSES & ACHIEVEMENTS

NPTEL: Introduction to IoT, Python for Data Science, Software Conceptual Design | Spoken Tutorial: C & Java Training
Pursuing: Software Testing / Manual & Automation Testing fundamentals (self-study, in progress)
NSS Volunteer | Coordinator, department symposium | Active in technical & non-technical college events
