

HEMAMAALANI SJ

CSE Graduate | Software Developer | QA & Testing
7904930149 | hemamaalani24@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

CSE graduate with hands-on experience building and testing web applications using React, JavaScript, Python, and Django. Co-author of a published IEEE conference paper on deep-learning-based medical image diagnosis. Combines development and QA skills — designs features and then writes and executes the test cases that validate them. Seeking a Project Associate role to apply and grow technical skills in a research and development environment.

TECHNICAL SKILLS

Programming: Python, Java, JavaScript, SQL

Web Development: HTML, CSS, JavaScript, React, Vite, Django

Software Testing: Manual Testing, Test Case Design, Functional Testing, Regression Testing, Bug Reporting, Selenium (Basic), Postman (Basic)

Databases: SQL

Tools: Git, GitHub, VS Code, GitHub Pages

AI / ML: TensorFlow/Keras, Machine Learning Fundamentals, Prompt Engineering

PROJECTS

ShopNest Store — E-Commerce Web Application | *React, Vite*

github.com/Hemamaalani/shopnest-store

- Developed a component-based e-commerce web application using React and Vite.
- Implemented and tested product listing, interactive UI flows, and responsive layouts.
- Performed functional and cross-browser testing and identified and fixed UI issues.

Student Mark Prediction System | *Python, Django, Machine Learning*

- Developed a Django-based web application integrating a regression machine-learning model.
- Implemented input forms and displayed model predictions through the web interface.
- Tested input validation, model outputs, and server-side functionality.
- Identified integration issues between the ML model and web interface and verified fixes.

JobTrack — Job Application Tracking Web Application | *HTML, CSS, JavaScript*

hemamaalani.github.io/job-application-tracker

- Developed and deployed a web application for tracking job applications and their statuses.
- Implemented add, filter, and status-tracking functionality using JavaScript.
- Designed and executed test cases for dashboard calculations and application workflows.
- Identified and fixed data-synchronization and UI-state issues before deployment.

CardioSense — Deep Learning-Enhanced Early Heart Disease Detection | *IEEE Conference Paper*

- Co-authored a published IEEE conference paper on deep-learning-based heart disease detection.
- Worked with Vision Transformer (ViT) and Deformable Attention Transformer models for medical image diagnosis.
- Validated model outputs against test datasets and documented edge-case findings.

EDUCATION

B.E., Computer Science & Engineering — Sri Sai Ram Institute of Technology (2022 – 2026)

CGPA: 7.88

HSC — St. Mary's Matriculation Higher Secondary School (2021 – 2022)

82.8%

SSLC — St. Mary's Matriculation Higher Secondary School (2019 – 2020)

73.8%

INTERNSHIP / EXPERIENCE

AI Animation Specialist Intern — Dinamalar (1 month)

- Created AI-generated video content and assisted with short-form video production using AI workflows.

Machine Learning Basics — Prodigy InfoTech Pvt. Ltd.

- Completed applied ML tasks (house price prediction, customer clustering), validating model outputs against expected results.
